SKILLS

Strong: JavaScript/ES6, PHP, MySQL, LAMP, Git, Bootstrap, jQuery, CSS3, HTML5, AJAX/JSON, API, GitHub
Experienced: AWS, Braintree, OOP, MVC, Photoshop, Wordpress, Laravel, Chrome DevTools, Composer

APPLICATIONS

Ever Hungry (Javascript, jQuery, Bootstrap, AJAX, JSON) | *Front-End on 6-Developer Team* [Live](#) | [Github](#)
API-rich application that randomizes foods, locates nearby restaurants and returns pictures and directions.

- Cultivated ideas as Scrum Master while adhering to Agile Methodologies and our dev schedule.
- Made use of Git for version control to maintain a merge conflict-free project repository on GitHub.

Fridge 2 Plate (LAMP, JavaScript, jQuery, AWS) | *Full-Stack on 4-Developer Team* [Live](#) | [Github](#)
Recipe-searching app with Braintree Payments, Google O-Auth login, and pay-to-feature functionality.

- Integrated Paypal's Braintree payment API to ensure our transaction data's security & legal compliance.
- Incorporated Google's O-Auth API into our login system while nurturing a seamless page flow UX.
- Eradicated bugs as one of our team's two developers troubleshooting both front and back-end bugs.

J.G. Hause (PHP, JS, WP, CSS, Ps) | *Freelance Full-Stack on 2-Developer Team* [Live](#)
Fully responsive, search engine optimized, custom Wordpress app utilizing the Genesis Framework.

- Translated client-provided Photoshop design files into fully functioning, responsive HTML markups.
- Harnessed media queries to exterminate bugs at all breakpoints and make the site highly responsive.
- Cultivated design to code process by extracting and transferring Photoshop design assets to Wordpress.

Street Matcher II (Javascript, jQuery, PHP, Photoshop) | *Sole Developer* [Live](#) | [Github](#)
SFII-themed matching game developed to reinforce logic and reasoning skills using JavaScript and jQuery.

- Implemented game's logic to initiate card flips and identify matches while preventing unwanted events.
- Features dynamic card creation, card shuffling, and custom card match animations and sound effects.

Student Grade Table (Javascript, Apache, MySQL, PHP, Bootstrap) | *Sole Developer* [Live](#) | [Github](#)
Content management system featuring full create, read, update, and delete(CRUD) functionality.

- Built a RESTful API in PHP and Apache to send statements and dynamic queries to a MySQL database.
- Utilized Bootstrap for responsiveness *without* CSS, a MySQL database to store student data, JQuery to dynamically update the DOM, and PHP to create the API for handling all CRUD operations.

PROFESSIONAL

Full Stack Web Developer - Freelance | Orange County, CA 2016 - Present

Lead Instructor - Modawei English | Taipei, Taiwan 2013 - 2016

- Resolved conflicts in high pressure situations while thinking on my feet and leading 20+ pupils.
- Lead instructional demos that attracted students, grew revenue, and ensured student retention.
- Guided over one hundred students and trained four staff members in English language acquisition.

EDUCATION

LearningFuze - Accelerated Web Development Program 2016
Udemy, Codecademy, TeamTreehouse, FreeCodeCamp - Web Development Courses 2016 - Present
National Taiwan University - International Chinese Language Program 2012
University of Minnesota, Minneapolis - B.A. Asian Languages and Lit (Chinese) - 3.89 GPA 2011

ABOUT

I'm originally from Minnesota. I lived in Taipei, Taiwan for 5 years and I speak Mandarin fluently. I love reading and am equally passionate about Asian film, especially Stephen Chow and Toshiro Mifune. When not coding, I'm most likely reading, exploring nature with my Shar-pei, gaming, or catching up on *Gintama*, *Game of Thrones*, *Dragon Ball Super*, or *Netflix Original Series (The Defenders)*.
