APPLICATIONS

Fridge 2 Plate (LAMP, JavaScript, jQuery, AWS) | Full-Stack *on 4-Developer Team*   Live | Github
Recipe-searching app with BrainTree Payments, Google O-Auth login, and pay-to-feature functionality.
- Set up and integrated the Braintree checkout system to create and store transaction data externally.
- Handled back-end logic to incorporate Google O-Auth and manage all the login-associated page flows.
- Resolved all bugs as team's only full-stack developer troubleshooting both the front and back-end.

Student Grade Table (Javascript, Apache, MySQL, PHP, Bootstrap) | *Sole Developer*   Live | Github
Content management system featuring full create, read, update, and delete(CRUD) functionality.
- Built a RESTful API in PHP and Apache to send statements and dynamic queries to the MySQL database.
- Utilized Bootstrap for responsiveness *without* CSS, a MySQL database to store student data, JQuery to
  dynamically update the DOM, and PHP to create the API for handling all CRUD operations.

Street Matcher II (Javascript, jQuery, PHP, Photoshop) | *Sole Developer*   Live | Github
SFII-themed matching game developed to reinforce logic and reasoning skills using JavaScript and jQuery.
- Implemented game's logic to initiate card flips and identify matches while preventing unwanted events.
- Features dynamic card creation, card shuffling, and custom card match animations and sound effects.

Couch Po-tah-to (Javascript, jQuery, Bootstrap) | *Front-End on 4-Developer Team*   Live | Github
Couch Potato pairs food, drink, and film with users' moods using mul
- Contributed in a senior developer role by supporting the junior developers unfamiliar with API calls.
- Acted as the team Scrum Master to help foster ideas and adhere to the development schedule.

PROFESSIONAL

J.G. Hause Custom Homes (PHP, JS, WP, CSS, Ps) | *Full-Stack on 2-Developer Team*   Live | Github
Fully responsive, search engine optimized, custom Wordpress app utilizing the Genesis Framework.
- Made the site responsive with media queries and resolved all bugs encountered at various breakpoints.
- Extracted all of the image files from the Photoshop Documents through the use of GIMP.

Lead Instructor - *Modawei English | Taipei, Taiwan*   *Spring 2013 - Spring 2016*
- Resolved conflicts in high pressure situations while thinking on my feet and guiding 20+ pupils at a time.
- Communicated exclusively in Mandarin Chinese and slowly transitioned to English as skills progressed.
- Instructed over 100 students and trained four staff members in English language acquisition.

EDUCATION

LearningFuze - *Accelerated Software Development Program*   *2016*
Udemy, Codecademy, ChinesePod, Treehouse - *Online computer/language courses*   *2015 - Present*
University of Minnesota, Minneapolis - *B.S. Asian Languages and Literature (Chinese)*   *2011*

ABOUT

I'm originally from Minnesota. I lived in Taiwan for 5 years and I speak Mandarin fluently. I love reading and am equally passionate about Hong Kong film, especially Stephen Chow. When not coding, I'm most likely reading, exploring nature with my Shar-pei, gaming, or catching up on Gintama.
